

# TOMATE OS

ARWEAVE PROTOCOL

# TODAY'S AGENDA

- THE PROBLEM
- HOW CAN YOU SOLVE
- MARKET REACHED
- GADGETS

# THE PROBLEM

## 01 | Internet for education

Because of the Covid-19 pandemic, classrooms have been replaced by computers and, in a country where 70% of the poorest families do not have access to the internet, it is impossible to say that all students have the same chances.

## 02 | Internert to include

Held in May this year with 2,150 Brazilians aged 16 or over in 71 cities across the country, the survey shows that the unbanked represent 29% of the adult population in Brazil. Six out of ten unbanked are women, that is, the female share represents 59% of the total, against 41% of men

# BRIEF INTRODUCTION

## TOMATE OS PROTOCOL

TOMATE IS AN OPERATING SYSTEM FOCUSED ON PERMAWEB AND ITS PARTICIPATION TOKEN AND DISTRIBUTED TO DEVELOPERS AND TO BUILD GADGETS (CELL PHONE, TABLET, ANTENNAS)

THAT ENABLE UNBANKED PEOPLE TO ACCESS THE OPEN WEB, SO THAT THEIR DATA IS FULLY PROTECTED..

# TOMATO OS IS THE SOLUTION?

## ARWEAVE AND BLOCKCHAIN CONNECTION

Tomate uses the arweave protocols to make the blockchain experience as easy as possible. for anyone to use.

## PROFIT OF PARTICIPATION

All participation tokens generated will be reallocated to build new features and technology to include people and projects in the permaweb

## INCLUSION OF MILLIONS OF PEOPLE

With the Aweave protocol and the ethereum protocol we were able to introduce thousands of people to the blockchain world, this introduction has a huge impact on the health and scalability of the protocols.

# IS THE INTERNET DEMOCRATIC?

**80%**

of students enrolled in high school in Brazil are from state schools, which have suspended classes.

**70%**

Class D and E residences are far from the virtual world, with no internet access.

**1 OUT OF 4**

Brazilians do not have access to the internet.

# LET'S BUILD TOGETHER

**TOMATO CREATES THEM  
AN INCLUSIVE  
ECOSYSTEM IN  
PERMAWEB**

## **TOMATO NODE**

Raspberry Node Device - Node with wifi distribution over internet 3g / 4g from latin america

## **TOMATO OPEN VIEW**

Raspberry tablet for a perfect connection and learning experience

# HOW MUCH DOES IT ALL COST?

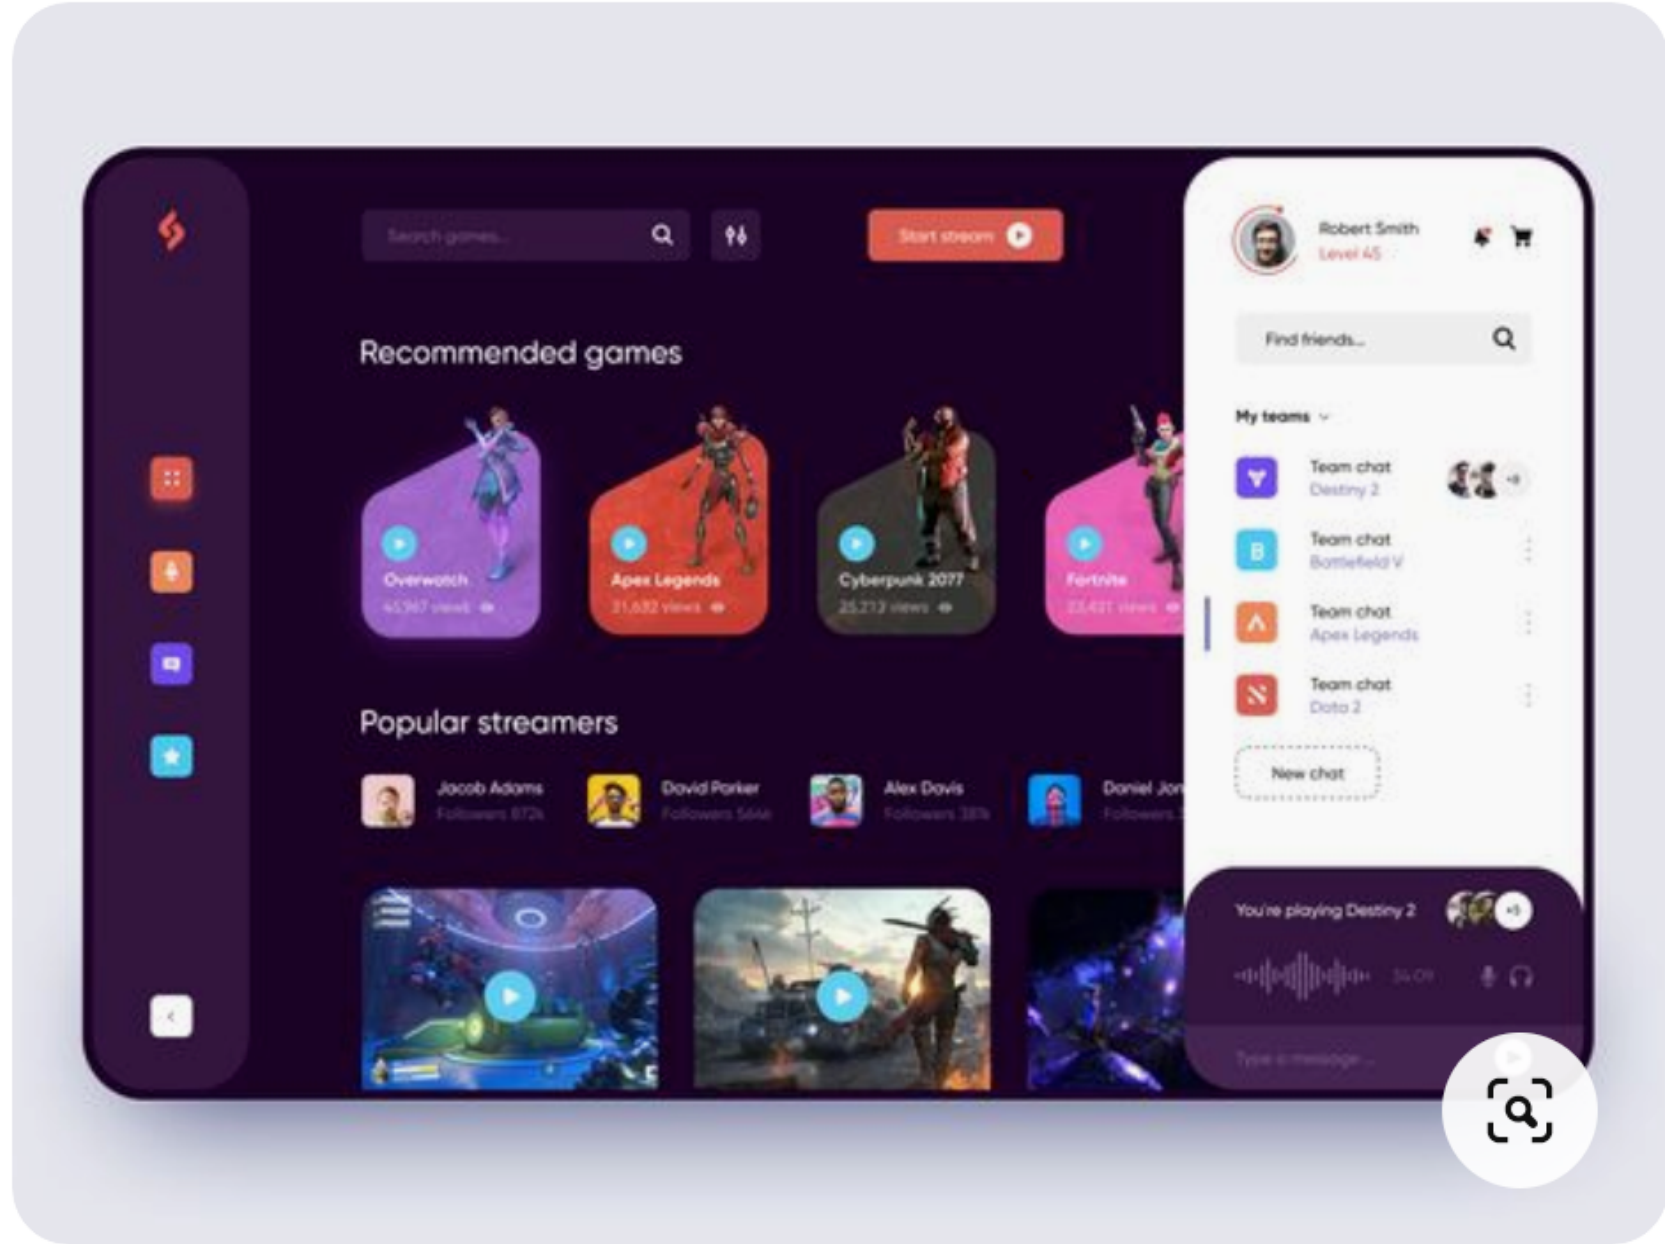

200 USD YOU CONNECT ONE PERSON FOR ONE YEAR

# TOMATE NODE

A DEVICE WITH OPEN  
INTERNET A

# TOMATO APP

# TOMATE OPEN VIEW

LEARNING DEVICE THAT  
CONNECTS TO THE OPEN  
WEB.

**WE WILL WORK WITH A  
QUADRATIC  
DISTRIBUTION, FOR EACH  
DEVICE SOLD WE WILL  
DISTRIBUTE THE SAME.**

PARTNERS

Open Web Incubator

**THANK YOU!**

**I AM FRED, I HAVE BEEN  
CONNECTING PEOPLE AND  
GIVING MEANING TO LINES OF  
CODE FOR OVER 10 YEARS.**
